

The Customized Career Development Platform (CCDP)

A Cluster Randomized Trial

The CCDP is an online app in which scholars and trainees develop an Individualized Development Plan (IDP), as required by NIH. This interactive tool facilitates interactions between mentees and mentors and enables mentees to strategically plan their career.

The UCLA CTSI is proud to be **one of 28 CTSA** sites participating in the trial!

The study aims to:

- Promote the careers of trainees and scholars
- Test the effectiveness of the CCDP
- Assess trainees' and scholars' satisfaction with the CCDP

Investigative Team:

- [Doris Rubio](#), University of Pittsburgh
- [Colleen Mayowski](#), University of Pittsburgh
- [Emma Meagher](#), University of Pennsylvania
- [Cecilia Patino-Sutton](#), University of Southern California
- [Julie Welch](#), Indiana University

More information about the study can be found [here](#).
