

CIRM ALPHA CLINICS NETWORK

# Regenerative Medicine Nurse Training Symposium

**SAVE THE DATE!**

**April 18 and 19, 2024**

City of Hope | 1500 E. Duarte Road, Duarte, CA 91010

This two-day program will offer training in clinical research and standard-of-care regenerative medicine therapies. In this rapidly evolving field, there remains an immediate need to equip direct patient care nurses with skills to manage patients on complex clinical trials as well as novel standard-of-care therapies. Additional responsibilities require familiarity with clinical trial protocols, advanced assessments, and sample collection and preparation, among other areas.

The program is designed for direct care registered nurses, clinical research nurses, advanced practice providers and other providers involved in delivering novel cell-based therapeutics.
